4 IUSY reaffirms that the climate crisis is, above all, a crisis of justice, rights, and social organization. It is not  
5 merely a technical challenge; it is a political and social one that demands collective organization, sustained  
6 cooperation, and justice. The scale of the crisis goes beyond isolated individual responses and requires  
7 communities capable of sustaining long-term processes.

8 We live in a state of constant outrage in the face of environmental degradation, yet this outrage is often  
9 fragmented. The climate crisis, by contrast, demands continuity, deep cooperation, and shared sacrifices  
10 that must not fall on those who have contributed the least to the problem and who suffer its impacts the  
11 most.

12 For these reasons, IUSY issues an urgent call to governments, youth, social movements, and international  
13 organizations to:

- 14 ● Transform fragmented outrage into collective power by building durable networks, strengthening  
15 community care, and developing the capacities needed to sustain long-term struggles and  
16 policies.
- 17 ● Advance genuine international cooperation, prioritizing South-South and triangular cooperation  
18 to exchange solutions, strengthen capacities, and expand solidarity among peoples.
- 19 ● Ensure just transitions, in which costs and sacrifices are shared equitably and climate action  
20 strengthens rights, well-being, and democracy.

21 IUSY affirms that effective climate action is born from cooperation and perseverance—not from quick fixes,  
22 but from shared processes sustained over time.
